

Whitepaper: Inpinity

Version 1.0 – February 2026

1. Introduction

Inpinity is more than just another cryptocurrency token. We are a decentralized ecosystem bridging the gap between blockchain technology, gaming, and digital advertising. Our goal is to create a sustainable and interactive platform where users can not only play but also earn rewards and actively participate in the project's governance.

Founded by the "Xpective" team, Inpinity combines innovation with a community-first approach. The token (\$INPI) is the core of this universe.

2. Project Overview

Project Name Inpinity

Token Ticker \$INPI

Blockchain Ethereum (ERC-20) / [Your Target Chain]

Contract Address 0x15ac8e2c38f0c644123e61011e7113de56038453

Official Website <https://inpinity.online>

Community Twitter: @unxpctive Discord: <https://discord.gg/95yj6Eg6> Telegram: <https://t.me/+1hl5Ou-pGChhYmUy>

Development GitHub: Xpective

3. Tokenomics

The economic model of Inpinity is designed for long-term growth and stability. The total supply is fixed at 1,000,000,000 (1 billion) \$INPI.

3.1 Supply Distribution

Category	Percentage	Amount (\$INPI)	Description
Public Sale	15%	150,000,000	Initial liquidity provision and public launch.
Team & Advisors	20%	200,000,000	Locked until "Judgment Day" (milestone event). Thereafter linear vesting over 24 months.
Ecosystem & Development	25%	250,000,000	For partnerships, development costs, and community grants.
Liquidity & CEX Listings	15%	150,000,000	Providing liquidity on DEXs (e.g., Uniswap) and listings on centralized exchanges.
Staking & Rewards	15%	150,000,000	Rewards for stakers and active community members.
Marketing & Partnerships	10%	100,000,000	Brand building, influencer collaborations, and strategic alliances.

3.2 Locks and Transparency

- Team Tokens (20%): As requested, these are fully locked until "Judgment Day". This builds trust, as the team only gains access when a significant project milestone is reached.
- Liquidity: Initial liquidity pools will be locked to prevent "rug pulls".

4. Roadmap

Our roadmap is ambitious but realistic. We focus on deliverable results.

Phase 1: Genesis (Q1 2026)

- Project Announcement & Community Building: Launch of Discord/Telegram.
- Smart Contract Audit: Security review of the token contract.
- Token Generation Event (TGE) & Launch: Public start of \$INPI.
- Initial Liquidity Pool (ILP): Provision of liquidity on decentralized exchanges.

Phase 2: Expansion (Q2 2026)

- Staking Launch: Introduction of staking mechanisms. Users can lock \$INPI tokens to earn passive rewards.
- First Listings: Discussions with CoinGecko and CoinMarketCap for listings.
- Community Governance: Introduction of an initial proposal mechanism (Snapshot).

Phase 3: Transformation (Q3 2026)

- Website Relaunch: Major website upgrade with dashboard features (wallet connection, staking overview).
- Partnerships: Announcement of first strategic partners in the gaming space.

Phase 4: Gamification (Q4 2026)

- Inauguration of "Ininity Games": Launch of a first mini-game.
- NFT Introduction: First collection of "Ininity Genesis NFTs". These offer exclusive benefits within the ecosystem.

Phase 5: Economy (Q1 2027)

- Marketplace Launch: A decentralized marketplace for NFTs and in-game items.
- Advanced Governance: On-chain voting for major project decisions.

Phase 6: Advertising & Rewards (Q2 2027)

- Introduction of the Sub-Token (\$ADVERT): A new token that can only be earned by holding and using \$INPI. This sub-token serves as an advertising currency within the ecosystem (e.g., to place ads or unlock premium features).

Phase 7: Interoperability (Q3 2027)

- NFT In-Game Utility: The previously purchased NFTs now gain full functionality in the main game (e.g., playable characters, skins, or power-ups).

Phase 8: [Open for Suggestions] (Q4 2027)

- Based on community proposals and market developments.

5. Utilities: The Power of the \$INPI Token

Why hold \$INPI? The token has seven core functions:

1. Staking: Hold your tokens and earn passive rewards. The longer you stake, the higher the reward tier.

2. Governance: \$INPI is your voting right. Holders can vote on future features, game updates, and the use of the community treasury.
3. Rewards: Active community members (e.g., moderators, content creators) are rewarded in \$INPI.
4. Exclusive Access: Holding a certain amount of \$INPI grants access to private Discord channels, exclusive NFTs, or beta tests of new games.
5. Game Utility (In-Game Currency):
 - Purchase Items: Equip your character in the Ininity universe.
 - Entry Fees: Pay tournament fees in \$INPI.
 - Rewards: Earn \$INPI through high scores and achievements.
6. Transaction Medium: On the future marketplace, \$INPI serves as the primary currency for trading NFTs.
7. Economic Driver: Holding \$INPI generates the sub-token \$ADVERT. This can be used to place advertisements in the game or on the platform – a novel model connecting players and advertisers.

6. Team

Xpective

A dedicated team of developers, blockchain enthusiasts, and visionaries who believe that the future of gaming must be decentralized and community-driven. The team places the highest value on transparency and long-term value creation.

7. Security and Legal

- Audit: The smart contract will be audited by a reputable third party prior to launch.
- Legal: Potential investors are advised to inform themselves about the regulatory situation in their country. This whitepaper does not constitute financial advice.
